

Dräger Prana Family of Medical Supply Units

A perfect combination of highly durable medical supply units which are convenient and safe and can be customized to suit individual needs. They are available in two variants - Sleek (S) and Wall (W).

Prana S

Prana W

Benefits

Space-saving flexibility in multiple care areas

The Prana family of medical supply units is designed for use in almost any healing environment, from normal wards to intensive care or in induction, observation and recovery rooms. The Prana family is a highly modular media supply solution, that can be custom built to suit your specifications.

Robust and modular construction

Prana is constructed from robust, extruded aluminium profiles. Rounded corners, edges and seamless fittings ensure safety, hygiene and easy cleaning. The length of Prana medical supply unit and the number of installation ducts for media terminals can be freely determined.

Matches the aesthetics

The Prana family is designed to complement a wide range of modern interior designs. You have a choice of faceplates in 4 standard RAL colours or even custom colours which can help you create a pleasant and relaxing environment for your patients.

Solutions for you and your patients

Like all solutions from Dräger, the Prana family is designed to make your clinical routine easy & efficient. The products offered by Dräger are developed with flexibility and compatibility in mind. The Prana family helps you to get most out of the space available to you, and is cost- efficient. The use of standard rails mean that Prana S can be used in combination with wide range of Dräger accessories as well as conformity assessed third party equipment. The rails extend the optional accessory combinations to your requirements. By providing reading light to your patients and orientation light to your staff, also in efficient LED technology, the Prana S provides comfort for everyone involved.

Customize Prana S and Prana W for your individual needs

The double duct design of the Prana S offers a flexibility of having medical rail either on left or right or on both sides. Central duct is reserved for the installation of media terminals for medical gases, vacuum, power supply and IT.

- Ample space for installation of medical terminals for medical gases as well as power supply and IT
- Ergonomically placed media terminals and medical gases as well as power supply and IT
- Upper or lower section features integrated light options
- Offers ISO Standard rail with load bearing capacity of 5 kg

In the compact single duct design, the upper section is reserved for indirect illumination and night light. The middle section of the Prana S is designed for installation of media terminal for medical gases, vacuum, IT and power supply. The lower section of the Prana S features a reading light. Your choice of medical rails can be mounted between the sections for lighting terminals.

With single, double and triple duct options readily available, the Prana W can be designed and manufactured with three ducts upon request. The compact yet ergonomic design of the Prana W provides space for media terminals and medical gases as well as power supply and IT.
